PROJECT OVERVIEW

Cavan County Council has taken the lead in developing Town and Village Revitalisation Plans for 20 Towns and Villages across the County.

These plans have been developed in recognition of the importance of supporting and developing the physical and social fabric of these towns. The objective is to enhance our Towns and Villages as more attractive places to live and to work.

The plans are ambitious and will act as blueprints for the development and enhancement of our Towns and Villages over the next ten to fifteen years.

An integral part of the success of these plans will be the role that communities within the towns and villages take in leading out in their implementation in conjunction with Cavan County Council and other relevant bodies. Identification of a broad range of projects within the plans will enable communities to easily prioritise and develop project applications.

1. The Context for County Cavan Towns and Villages

Towns and villages play a key role in terms of serving the economic, social, cultural and community needs of the people and their hinterland. However, many towns and villages throughout Ireland are experiencing huge changes in terms of their commercial, aesthetic and cultural landscape. Provincial towns and especially provincial villages are under serious threat from the polarising effect of the larger city economies.

County Cavan is no exception to these changes. But while it shares the generic planning challenges that most provincial towns face such as out-of-town retail and residential development leading to dereliction of established town centres, Cavan County has also some very specific characteristics and needs. In particular South East Cavan due its proximity to the Greater Dublin Area has seen significant rise in population resulting in significant commuter numbers in some of the towns. In contrast parts of West Cavan, nested within pristine landscapes but in remote locations are suffering from population decline. County Cavan also faces challenges on account of its proximity to the border with Northern Ireland.

Within this context, as both the towns and villages experience huge changes across County Cavan, there is a greater importance placed on developing places that will be resilient and sustainable in the years and decades to come. In this context, County Cavan Council aim to harness local community and entrepreneurial spirit, in order to develop Revitalisation Plans for the towns and villages of Cavan.

2. Project Purpose and Outcomes

In September 2017, Tyréns UK and GCAL were commissioned by County Cavan Council to undertake the Town and Villages Revitalisation Plans project. The project will complement studies already undertaken by County Cavan and local Councils aimed at securing the long-term future of Cavan's towns.

The project encompasses the revitalisation of the following 20 towns and villages:

Cavan Town	Kingscourt	Ballyhaise	Swanlinbar
Virginia	Belturbet	Shercock	Butlersbridge
Bailieborough	Mullagh	Killeshandra	Blacklion
Ballyjamesduff	Ballyconnell	Arva	Lough Gowna
Cootehill	Ballinagh	Kilnaleck	Dowra

The purpose of this study is to prepare plans showcasing how improvements can enhance the town as an attractive place in which to live, play, work, and visit. The Revitalisation Plans will seek to enhance and improve town and village functions both on a day to day basis, while also seeking to improve the long term socio economic, cultural and environmental benefits for residents, businesses, communities and visitors.

The outcomes of the Revitalisation Plans are three-fold - to deliver successful strategies across spatial development, economic development and community development. The project will seek to ensure that the design of these town and village plans recognises the diversity that exists in the County of Cavan and will tailor each plan for the site specifics of each settlement.

3. Project Structure

The project has been structured as follows:

STAGE 1 - BASELINE

- · Review of background material, reports, studies and strategies
- · 'What makes Cavan Cavan' engagement campaign
- · County wide analysis
- · Review of consultation findings

STAGE 2 - REVITALISATION PLANS

- · Individual Town and Village Revitalisation Plans
- . Consultation workshops

4. Objectives and Role of this Report

This report is one of a sequence of twenty reports providing a final summary of the proposals and proposals prepared as part of the County Cavan Towns and Villages Revitalisation project. This report is the final revitalisation report for Lough Gowna (town 19 of 20).

The report sets out a series of proposals focusing on spatial, economic and community development, establishing recommendations for implementation timescales. The proposals are action-based and spatially focused and provide an urban design and public realm framework to inform local planning policy and future development and/or regeneration proposals, covering place-making, open space, transport, parking, heritage, iconic features and vistas, natural environment etc.

The report also compiles findings from the community engagement. The current design for Lough Gowna is the result of a collaborative process with County Cavan Council, citizens, stakeholders and neighbours groups.

5. Project Deliverables

The following reports have been or will be delivered as part of County Cavan Town and Village Revitalisation Plans project documentation:

STAGE 1 - BASELINE

STAGE 2 - REVITALISATION PLANS · Draft and Final Individual Town and Village Revitalisation Plans

6. Project Programme

The early stages of the project - October 2017 to January 2018 - were dedicated to understanding the towns and villages context. During this period community engagement events were carried out as part of the 'What makes Cavan - Cavan' campaign.

Following this stage, from January to early February 2018, a County Wide Strategy has been prepared establishing a shared vision for County Cavan's towns and villages, identifying unique selling points, focus areas and themes for the Revitalisation Plans.

From February to May 2018, Revitalisation Plans have been prepared for each individual town. These plans have been supported by a series of workshops with the community.

7. The Tyréns and Gaffney & Cullivan Architects Approach

The GCAL and Tyréns team bring global thinking and local knowledge to the project. GCAL as Lead Architect bring expertise, extensive experience and considerable local knowledge of County Cavan. The practice specialises in built heritage which leads to proactive conservation architecture and renewal. Tyréns is a European multidisciplinary masterplanning, urban development and sustainable infrastructure consulting firm specialised in community and regional planning. The combination of Tyréns international experience coupled with GCAL's wealth of more local knowledge brings a unique perspective to the project.

Disciplines inputting to the project include urban design and planning, landscape architecture, transport and community capacity building. Working with the council's team, Tyréns and GCAL approach centre around people, their needs, their habits and their vision to inform the design of urban space. Tyréns and GCAL's goal is to activate factors that allow towns and villages to flourish as attractive places in which to live, work and socialise in.

 Draft and Final Baseline Report - Site Analysis including SWOT analysis of each town and village and a County Wide analysis

INTRODUCTION

This report details the proposals aimed at revitalising Lough Gowna. It is structured in the following way:

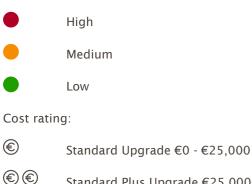

Section A - County Wide and Town Specific Proposals

Section A of the report identifies and describes proposals that are recommended to be implemented both county wide and on a town-by-town specific basis.

The section begins by presenting County Wide Proposals (referenced as CWP) that are recommended to be rolled out in each town across County Cavan. The report continues to outline a series of potential Town Specific Proposals (referenced as SP) that are recommended to be implemented in specific towns and villages across County Cavan only. The town specific proposals will be relevant to only some of the towns, and will be explored with further clarity in each report.

Each proposal is also associated with a suggested priority rating and predicted cost. This assumption is based on findings from consultations and feedback from members of the public. Both ratings are represented alongside each proposal with the following icons:

Priority rating:

Standard Plus Upgrade €25,000 - €100,000

€€€ Premium Upgrade €100,000 +

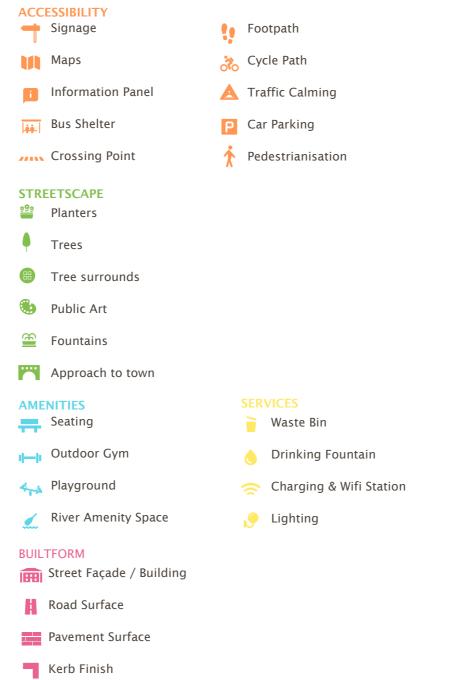

Section B - Lough Gowna Proposals

Following from this, the report outlines the proposals identified for Lough Gowna. Firstly, a map is used to illustrate the location of both the County Wide Proposals (CWP) and Lough Gowna Specific Proposals (LGSP). On the map, each proposal encompasses a series of physical elements such as waste bins, lighting and seating etc. These items are identified by icons. These items are colour coded in reference to the key themes used in the Stage 1 framework to illustrate the challenges and opportunities affecting County Cavan's towns and villages. The themes are as follows;

1. Accessibility

- 2. Streetscape
- 3. Amenities and Services
- 4. Builtform
- 5. Initiatives and Events

Proposed themes and their associated icons are as follows;

Flexible Pavilion

٠.

Following the summary map, each proposal for Lough Gowna is detailed with supporting text, existing and proposed imagery or graphics.

In Section B, a table summarises all the proposals for Cavan and presents estimated costs and phasing.

Section D - Consultation Findings

Section C - Summary

Section D.

A first draft of the proposals presented in this report has been subject to a public consultation which led to the revised and final suggestions of this final report. A summary of the process and findings of the public consultation can be found in

COUNTY WIDE PROPOSALS

This section outlines recommended proposals to roll out in all 20 towns and villages across County Cavan. Proposals have been categorised into 'Standard', 'Standard Plus' and 'Premium' upgrades.

Many of the proposals suggested within these reports are recommended to be implemented in all of the 20 towns and villages involved in this study. It is important to consider these County Wide proposals at the scale of the county in order to create an integrated and seamless strategy, whereby items such as street furniture and wayfinding are uniform across multiple locations. Not only is this a cost and implementation benefit, but it will also strengthen the visual identity of Cavan as a County, to residents and visitors alike.

Proposals have been categorised as 'Standard', 'Standard Plus' and 'Premium' upgrades based on cost, together with an indicative priority rating for their implementation.

County Wide (CWP) 'Standard Upgrades' have been identified as:

CWP1 Public Seating CWP2 Waste and Recycle Bins **CWP3** Planting CWP4 Information Signs with Wifi/Charging Point CWP5 Paving

County Wide (CWP) 'Standard Plus Upgrades' have been identified as:

CWP6 Approach Signage CWP7 Murals and Public Art **CWP8** Electric Vehicle Charging Point **CWP9 Walking Routes**

County Wide (CWP) 'Premium Upgrades' have been identified as:

CWP10 Facade Painting

Standard Upgrades 🛞

CWP1 Public Seating

The first County Wide proposal is to provide upgraded and additional public seating throughout the towns. The design could incorporate the town's local history or natural assets by integrating the seat with an art installation, or simply repainting any existing public seating with vibrant imagery. The benches should be of a natural aesthetic (e.g. wood) and of a relatively traditional appearance in order to fit the local character of the area.

Seating could include benches and chairs that would allow people to rest and enjoy the public spaces. The seating should ideally be sourced from a local (County Cavan) carpenter(s) or furniture manufacturer(s) and therefore hopefully made from locally (and/or nationally) sourced materials. This will give the dual benefit for generating local employment/boosting the local economy and having a lower carbon footprint than importing from overseas. As a longer term option, introduce smart seating to key central spaces with integrated wifi, charging and information points.

CWP2 Waste and Recycle Bins

Waste bins should also be sourced and fabricated locally. They should be made of natural materials where possible, and should aesthetically fit the local character of the area.

The bins should be secure to prevent theft and should have small openings to prevent people from using them to put their household waste in. Recycling bins should be implemented where possible without proposing bulky and invasive bins.

TL: Sensitive and informative design, Brecon Beacons TM: Smart bench with charging, data collection and wifi hot spot *B* and TR: Benches painted by the local community

T: Modern waste bins B: Underground recycling bins

CWP3 Planting

In order to enhance the visual experience for both residents and visitors, a planting strategy should be implemented across all towns. Planting in the towns and villages could be landscaped using locally sourced stone to create a natural and local character. This character would also reference the topographical landscape of County Cavan. Planters could also be sourced and made locally using timber. They could also include built in planting elements, which could feature a diverse range of seasonal plants that can be enjoyed all year round.

Trees should be added throughout the town/village centres as they provide innumerable benefits to both the environment and residents. A good diversity of tree species should be used in order to create lush vegetation with a healthy flora environment. The introduction of tree surrounds double up as seating, and can be an easy way to create attractive landscaping to the urban environment. Permeable paving can also be used to allow the trees to capture run-off through the design of SUDS.

- *TL: Trees and seating create event and interaction spaces, Tullamore* TR: Property owners encouraged to use hanging baskets, Cornwall
- BL: Trees along the street
- BR: Tree surrounds, also acting as seating

CWP4 Information Signs with Wifi/Charging Point

A well conceived signage strategy featuring a combination of signs, maps and information panels is important to effectively inform both residents and visitors, and will create a legible and identifiable town centre. In addition to this basic wayfinding function, good signage will enhance the character of the town, reinforce the hierarchy of spaces and contribute to the streetscape aesthetics.

Design standards should be established and replicated across all signs to ensure they are consistent and complementary. Use materials that fit the character of the town, for example locally sourced timber, which is high in quality, durable and easy to maintain.

All towns across Cavan should feature a principal map with text indicating current location, landmarks, features, routes and other amenities. This principal map should be located on the main public square or similar high pedestrian traffic areas.

Public information panels provide users with more detailed information about their surroundings by explaining the significance of a specific feature or space. Information panels could be interactive or tactile to add interest and encourage use. The information signs could be integrated with wifi and/or charging points for mobile phones. Lighting poles, bus shelters, kiosks and benches can also be used to offer digital services and should be solar powered where possible.

TL and BR: Information Map TM: Information Panel at a key landmark TR: Information sign at a key location BL: Interactive Information Panel

L: Pavement of the main street of a small town, with a landscaped buffer zone *R*: Location and width of footpath zones as described above.

CWP5 Paving

Footpaths are a fundamental and necessary investment for all towns across the county. Often the main streets support high levels of vehicular traffic, and therefore pedestrian access and safety should be a priority. Well designed and maintained pavements encourage walking by making it safer and more attractive, but also support socialising and generate active streetscapes. Pavements should be provided on all urban streets, be accessible to all users and be uncluttered of unnecessary furniture. Pavement surfaces and kerbs should make use of locally sourced natural stone where possible.

Good quality footpaths should feature in the following zones:

- sense of safety for pedestrians.

Buffer Zone (A) - should be of appropriate scale and delineated by vertical or horizontal separation - trees, kerb extension etc. - from traffic to foster a

Street Furniture Zone (B) - sits adjacent to the buffer zone and is where street furniture and amenities should be located and aligned.

Clear Path (C) - is the primary, dedicated and accessible pathway that runs parallel to the street. It should be at least 1.8-2.4 m wide to ensure that two people using wheelchairs can pass each other. It must be free of fixed objects and deformities that would make it inaccessible.

Frontage Zone (D) - is at the edge between the clear path and buildings and should focus on how to make both attractive.

Standard Plus Upgrades 🛞 🕄

CWP6 Approach Signage

The various approaches to towns are critical to creating a strong and welcoming sense of arrival. Furthermore, as all towns and villages within County Cavan are located in rural areas with scenic views of the countryside, the approaches are sensitive spaces that can either support or be detrimental to the integration of the town into its surroundings. These approaches also signify a threshold, whereby the streets become less car oriented, more pedestrian and cycle focused in the town centre.

Bespoke signage should be introduced at the approach to the county itself and to each town and village. Signs should illustrate the location within the county, and could provide additional information such as population and an interesting unique fact. Towns should encourage the design of colourful planting and landscaping to the surrounds of the new signs to further enhance the arrival experience. An effort should be made to limit billboards.

CWP7 Murals and Public Art

Public art is the most effective way to promote a town or village's individual character. Tourism will be encouraged furthermore through the marketing of local culture and art through social media platforms and the internet.

Various types of public art should be considered as part of an overarching strategy for each town and village. Ideas include; creative structures and pavilions, sculptures and street art, which should be designed for key public spaces.

There is existing public art in the form of street art and mural paintings across many of the towns and villages including Ballinagh, Swanlinbar and Kilnaleck.

CWP8 Electric Vehicle Charging Point

To encourage behavioural changes towards using more sustainable transport solutions, additional electric car charging stations should be provided across the county. These should be located at convenient and central locations to strengthen the benefits of having an electric car. Stations could be incorporated into lighting poles to avoid cluttering the streetscape with additional items.

TL: Proposed design of approach signage for County Cavan towns TR and B: Welcome sign enhanced with colourful planting

T and *BL*: Example of murals referencing the local heritage of the town and created by the local community *BR*: Existing street art in Ballinagh

E-car charging station

CWP9 Walking Routes

Each town should have a variety of walking trails in order to encourage residents and visitors to explore the built, natural and tourism assets as part of well signed routes. Trails could also include information panels at specific points of interest along the way.

CWP10 Façade Painting

Well maintained and aesthetically pleasant street facades account for creating a welcoming and vibrant atmosphere in towns, and can also add to the character of the streetscape. This can be achieved through the implementation of a façade painting scheme, improvements to shopfronts and building frontages, or the commissioning of artwork murals, lighting schemes etc. Special treatment should be given to historic buildings that provide a special architectural, cultural or heritage value to the townscape. Landmark buildings that strengthen the identity of a town should also be well maintained and presented within the streetscape. Derelict sites should also be addressed, as they are often key spaces which could add to the character and experience of a town. Such schemes can be phased, by prioritising proposals at key locations, at entrances to town, at key nodes, and at areas around public spaces. Acting as a catalyst for future improvements, the upgrading of key sites and buildings will create maximum impact and encourage incremental changes across other parts of town.

Variety of sign design along countryside walks

TOWN SPECIFIC PROPOSALS

This section outlines some possible proposals that will be specific to the towns across County Cavan. As within the County Wide section, proposals have been categorised into 'Standard', 'Standard Plus' and 'Premium' upgrades.

N.B: these proposals hold no priority rating as they are location specific. Priority ratings are summarise on page 30.

Standard Plus Upgrades E

SP1 Street Redesign

Given that many of the 20 towns and villages are located along regional and local roads, through-traffic and parking are major issues experienced throughout County Cavan. These towns suffer from huge volumes of cars and industrial sized vehicles traveling along the main street. This makes for an unfriendly and dangerous pedestrian and cycle environment, that is often worsened by a lack of crossing points, narrow and damaged pavements.

Key street sections should be redesigned to create 'complete streets' that are safe and to be enjoyed by all users. Proposals could include new crossing points and refuge islands, cycle paths and associated facilities, high quality intersection surface treatment, contemporary lighting and street furniture that reflects the character of the area, shared surfaces where appropriate, traffic calming features and parking control measures. Road surfaces should be renewed when necessary to make streets both safer and more aesthetically pleasant. In particular, the use of different materials could reduce the reliance on road markings.

SP2 Car Parking

Generally there is a good provision of parking across most towns and villages in Cavan. However many car parks and on-street parking could benefit from a redesign and/or realignment, enhanced with the introduction of landscaping, lighting and furniture.

Designated parking spaces for car users with disabilities should also be provided in every town and village across the County. These should be located next to key amenities with dropped kerbs to allow easy wheelchair access. Poorly designed disabled parking should be avoided: bays should not be fitted into leftover space but should instead be purposely designed from the start as part of a holistic strategy.

Premium Upgrades © © ©

SP3 Public Space

Improvements to existing the creation of new public spaces can activate and bring key amenities to previously lifeless towns. Plazas, squares and urban parks should be transformed into multi-use destinations, supporting a variety of civic and community uses including markets, events, seasonal programming etc. Public spaces are also spaces to rest, meet, interact and play, and should therefore incorporate seating, informal play items, canopies, landscaping and water features. The creation of new public spaces in the existing urban fabric can take advantage of building setbacks or wide roads. Community involvement in the cocreation of public spaces should be encouraged, as a way to foster a community's sense of pride and shared ownership of the town.

Public spaces could integrate flexible pavilions, which could trigger various uses and activities including pop up food stalls, amphitheatres for mini-concerts, performances, meetings, spaces to host yoga, cooking or meditation courses, offer of local services etc. Pavilions could also be made bookable by the local community in order to organise and host their own events. The design of pop up and transportable structures would also enable usage across multiple locations.

TL: Use of differentiated paving to strengthen the visibility of the crossing TM: Cycle physically separated from traffic on the main street BL: Shared surface

TL: Successful town centre car parking integrated with a landscaping scheme TR: The use of multiple surface materials to add texture and visual interest. BL: Disabled parking bay and sign, Ireland

TL: Temporary activation of the public space TR: Pavilion dedicated to the discovery of urban gardening in Aarhus, Denmark B: Leyteire urban garden

SP4 Pedestrianisation

In the larger towns of the county, such as Cavan Town or Bailieborough, the pedestrianisation of some streets could be explored. Pedestrianisation can activate streets for new uses, foster interaction and encourage pedestrian movement. Overall, it makes the street more active, safer and healthier. It can also boost the local economy by generating higher footfall levels in retail areas.

In order for the concept of a shared or pedestrianised street to be well received locally, the proposal could be phased over time through small incremental measures. This could begin with pavement extensions, the creation of a shared street, the reduction of carriageways to single lane, the licensing of outdoor seating for cafés and pubs. Similarly, a short section of the road can be redesigned with space for a cycle track, large planters, trees, seating spaces and terraces. The community can also be encouraged to reinvent the public realm through the flexible and temporary programming of streets, such as events, street parties, markets, play streets, open streets, pedestrianisation one day a week etc.

These proposals will demonstrate the diverse ways in which a street may be utilised and may lead over time to more permanent transformations of the rightof-way.

SP5 Outdoor Gym and Playground

Playgrounds and outdoor gyms can inspire people to engage in healthy, active and outdoor lifestyles. They also serve as spaces to meet and socialise. To ensure high levels of use, they should be located near residential areas and be easily accessible by both pedestrian and cycle routes.

Playgrounds should be specifically designed for the space and context they sit in, and also make use of the available natural materials and planting. They should feature disabled friendly items and sensory rich equipment, encourage both ordered and informal play activities and support an assortment of games to appeal to different user groups. Such playgrounds should foster a sense of freedom, inspire creativity and boost the physical abilities of children.

Outdoor gyms provide public accessible places to train alone or in groups with numerous structures. Each gym should have its own character with an attractive design solution. The design should be versatile to allow users to develop their own exercises and for people of all fitness abilities to use and enjoy. In more rural areas, fitness trails could be a more appropriate solution.

SP6 River and Lakeside Amenity Space

Those towns and villages located near a river or a lake should aim to create amenity areas by the water for leisure, sport and recreation. These would positively contribute towards quality of life by providing an opportunity for all residents and visitors to access good quality open space facilities year round.

The range of activities offered could include: horse riding, cycling, picnicking, competitions, festivals, bird watching, nature trails, photography, orienteering, climbing, camping, swimming, boating, canoeing etc. Light structures such as a shelter or pavilion can facilitate the provision of a food and beverage offer and could facilitate scheduling events such as concerts and competitions. Legible pedestrian links from the amenity space to the town centre should be developed in parallel.

The promotion of the amenity value of rivers and lakes should be coupled with a strong focus on ecology by ensuring that developments do not disproportionately impact on the landscape and natural areas. The appropriate location, sitting and design of proposed spaces will ensure that the natural resources which form the basis for recreation are protected and effectively managed.

T: A Parklet event - temporary pavement extension for amenity on parking spaces - and temporary street pedestrianisation, Hammersmith, London B: Pedestrian Street in Boulder

T: Playgrounds in Oberhausen, Germany and New-York, USA B: Outdoor gym in Brisbane and trim trail in Tom Ruana Park, Mayo, Ireland

T: Amenity space for walking, resting, fishing and sport in Lünen, Germany and Annecy, France B: River dedicated to swimming in Rostock, Germany

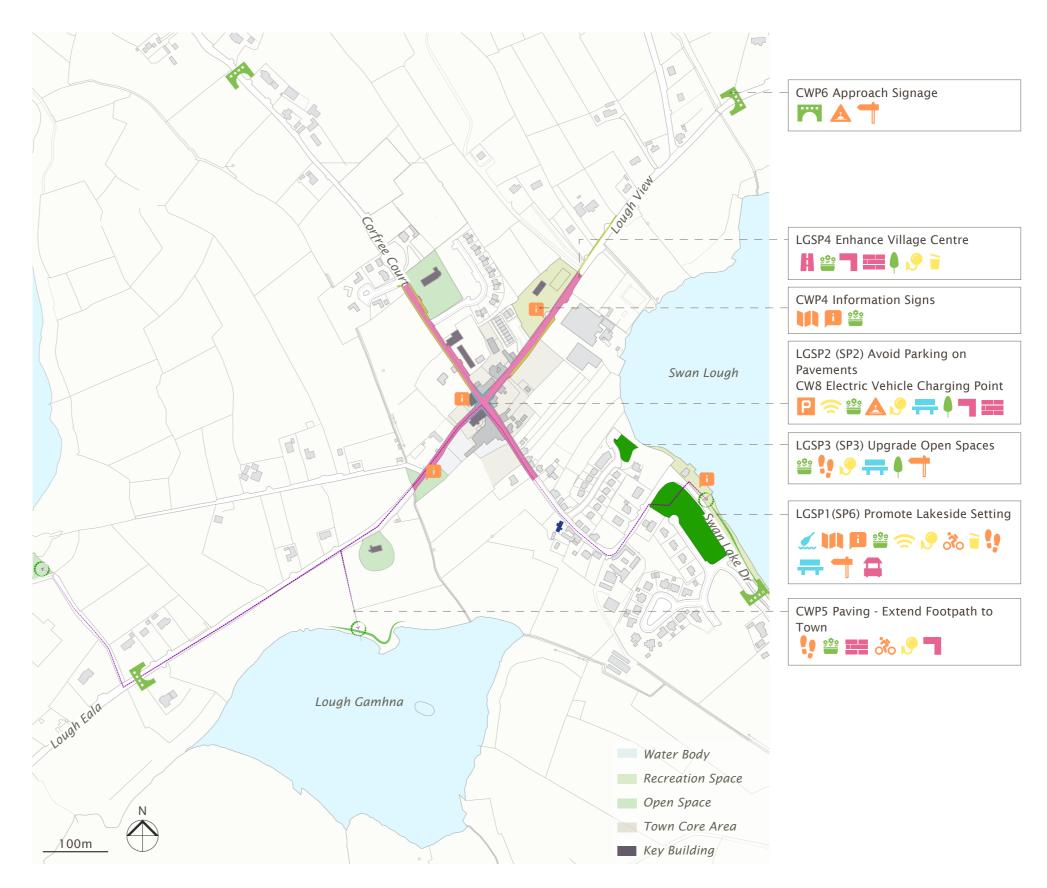

PROPOSAL MAPS

This section outlines proposals recommended for Lough Gowna.

* Please note: LGSP - Lough Gowna Specific Proposal CWP - County Wide Proposal

N.B

CW1 Public Seating and CW2 Waste and Recycling Bins are to be located along key routes and at public spaces within the Town Core Area. Proposals relating to traffic, transport and parking alterations will be subject to a traffic audit and a detailed engineering design exercise.

County Wide Proposals €● **CWP1** Public Seating

In keeping with the county wide proposals, a key item to consider for upgrade or replacement in Lough Gowna is public seating. Currently, public seating is only available by the playground, as part of the picnic tables. Elsewhere in the town centre, there is a lack of seating available along key routes and in open spaces. Additional provision would encourage pedestrian use and create a more active centre.

As illustrated opposite, the bench design should be durable, and resistant to long term weathering. The seating should be securely fixed to the paving, and be made of local and traditional materials if possible. Benches should be minimal in design, and allow for multiple views by the user by not having a structural back. New seating should be introduced as a priority along main roads and at key open spaces within the Town Core Area as shown on the proposals map.

Lough Gowna - existing: provision of picnic tables by the playground.

Proposed: above: durable public benches to be specified in multiple locations. Below: curved seating to be implemented in parks and open spaces.

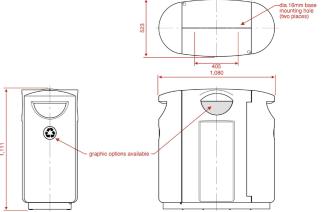

€ **CWP2 Waste and Recycle Bins**

In conjunction with the county wide proposals discussed previously in this report, new combined recycling and waste bins will be positioned within Lough Gowna and across other towns in Cavan. Currently, the bins provided in Lough Gowna do not allow for recycling, lack a cohesive design and are in poor condition. New bins should be introduced as a priority along main roads and at key open spaces within the Town Core Area as shown on the proposals map. Designed with small openings, this will discourage misuse of the bins.

Lough Gowna - existing: waste bins in the town centre - no allowance for recycling and lack of cohesive design.

Proposed: Cast Ductile Iron litter bin with 3 compartments; litter and recycling.

In conjunction with public realm improvement measures, consider the introduction of trees and planters in the town centre. This would enhance the aesthetics of the streetscape and strengthen the picturesque character of the village. In order to enhance biodiversity levels, introduce native and diverse plant species, which would also attract wildlife and minimise maintenance levels.

Trees and planting should be located as per indicated in the proposals map.

Proposed: durable wooden planters

€ **CWP4** Information Signs with Wifi/Charging Point

As per the county wide guidance, run down or missing signage within Lough Gowna should be replaced with newly installed information signs for all users; pedestrians, cyclists and vehicle drivers.

In particular, it is recommended to improve existing information signs in the centre of Gowna as part of a series of panels located at key destinations, such as the lakeside amenity areas at Lough Gowna and Swan, the play area on Lough View and the open space on Lough Ela. These should promote local heritage as well as the natural and amenity features of the town and surrounding area.

The format, layout, colours, fonts and over all design should be in conjunction with signage found in all other towns within Cavan.

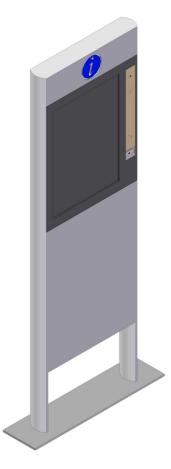

Lough Gowna - existing: information signs

200	
	1
	_
	11
	4
	+
	11
	1

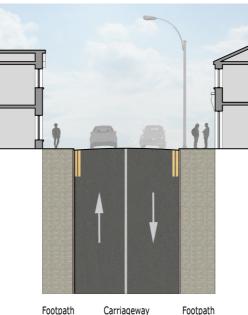

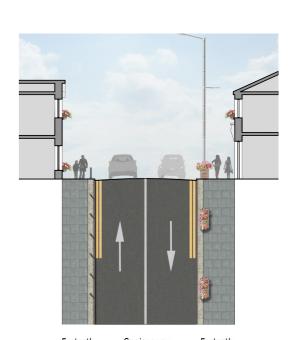

In order to discourage short trips taken by cars, and to improve the pedestrian and cycle schuafety/experience, extend the existing footpaths towards the town centre. These new footpaths should be well lit, feature a planted buffer to the carriageway, and accommodate cycling.

Within the town centre, many of the existing pavements are constructed of incohesive materials and are dishevelled. Consider upgrading pavements to freshen up the appearance of the village. Such a measure should be integrated with the introduction of new planters, street lighting, bins and seating. Similarly, consider widening the pavements where indicated on the proposals map to create small public realm spaces and activate the streets.

Footpath Carriageway

Lough Gowna - existing: section of Corfree Court, with narrow pavements not well

buffered from adjacent traffic.

designed and wider pathways.

In order to better promote Lough Gowna and create a welcoming approach to town, it is recommend to improve the existing arrival signage along approach roads, namely Lough View, Lough Eala, Swan Lake Drive and Corfree Court. The signage should follow the county wide guidance; be clear and distinctive, and celebrate Gowna's unique lakeside setting.

Lough Gowna - existing: a lack of coherent and welcoming approach signs.

Proposed: use of county wide signage with local information and fact. (N.B information will be town specific in detailed design).

Footpath Carriageway Footpath Proposed: use of planting and local materials to create aesthetically pleasant, well

In order to protect, enhance and promote the village's heritage, its natural context and strong community feel, consider installing murals and paintings on blank frontages. This could be done by working with local schools and community groups, and by taking inspiration from the colourful and effective installations outside of the National School.

Key locations for the introduction of public art include the building within the park, St Bridget's Community Centre, and on the corner of Fitzpatrick Tavern. In the longer term, other locations could be identified in partnership with local residents. Such artworks would create landmarks and memorable views, thus strengthening the identity of the village and enhancing legibility.

Lough Gowna - existing: public spaces lacking art installations.

Proposed: reinstate key buildings and façades with murals related to the town's features and heritage. (Ledwidge mural).

€ € ● CWP8 Electric Vehicle Charging Point

With increasing amounts of electrical vehicles being used, towns should ensure that there is sufficient provision of electrical charging points. These should be located with close proximity to the town's retail street or close to key attractions. As per the proposals map, it is recommended that additional charging points be located within the redesigned on-street parking bays.

Lough Gowna - existing: no provision of e-car space in the town centre.

Proposed: provide additi spaces.

·
 •••••••••••••••••••••••••••••••••••••••

Proposed: provide additional e-car charging points with designated parking

Consider the creation of three walking routes of different lengths - 0.5 km, 1.4 km and 3 km. These would guide walkers around the town centre, allowing users to discover the key landmarks, views and natural assets of Lough Gowna. The 0.5 and 3 km routes will also connect to Swan Lough and should therefore be supported with adequate seating, picninc spots and bins. It is recommended that these walks feature interpretative and interactive signage materials.

Ŕ

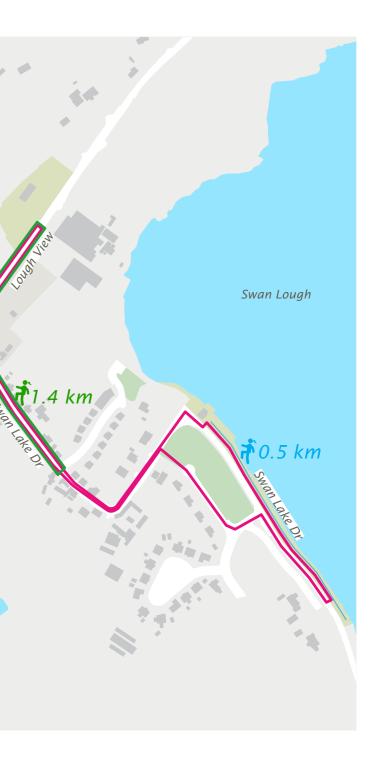

Lough Gowna - existing: views over Swan Lough

Proposed: markers along the walking routes

Proposed: Lough Gowna urban walking routes

Lough Gamhna

In order to protect original shop fronts and promote local heritage and identity, consider the implementation of painting schemes and heritage grants. A cohesive palette and design scheme should be created for all involved frontages. The appearance of the village could be further enhanced by encouraging owners to install and maintain hanging baskets and murals.

Lough Gowna - existing: key façades in need of refreshment

Proposed: encourage property owners to paint their façades with a set colour palette to create a bright and uplifted town centre.

Lough Gowna Specific Proposals (LGSP) €€€ LGSP1 Promote Lakeside Setting

Promote and improve the existing lakeside amenities by introducing new activities, together with supporting existing uses such as fishing. This will better position Gowna as a recreation destination for all groups and ages. To activate the lakeside whilst ensuring the protection of its natural setting, consider the introduction of formal structures such as jettys, together with footpaths, seating areas and flexible sheltering structures that could support new uses to the lakes such as kayaking.

Similarly, given its walking distance to both Lough Gowna and Lough Swan, efforts should be made to better position Gowna as a tourism destination. Improved signage could use a map to illustrate details of walking/cycling trails, view points and the location of amenities such as picnic facilities. The design of such a map should follow the county wide guidance.

Proposed: above: create jettys and footpaths to enable access to the waters edge for recreational activities.

€ LGSP2 Avoid Parking on Pavements

At the main intersection of Gowna, parked vehicles currently block views to key frontages, which discourages pedestrian users and has a negative overall impact on the arrival experience. As such, widen and upgrade the pavements surrounding the main intersection, in order to prevent vehicles parking on the pavement. Formal trees and planter boxes could be installed to further achieve this control.

Lough Gowna - existing: vehicles parking by the main intersection of Gowna

the pavements to park.

Proposed: widen pavements and introduce planting to limit vehicles encroaching

Gowna features a number of local green amenities serving the daily recreation and leisure needs of residents and visitors. In order to further improve these key open spaces and to enable them to act as destinations, encourage estates to avail of grants. In doing so, the open spaces central to the village and along lake frontages should be prioritised. Improvements should encompass the introduction of seating, bins, formal paths, lighting and planting. Similarly, the provision of clear signage and maps would further promote these amenity spaces and ease wayfinding from the town centre.

Lough Gowna - existing: under used green space close to Swan Lough.

Proposed: consider improvements to the key open spaces in town, through the introduction of seating, footpaths and lighting.

€ € ● LGSP4 Enhance Village Centre

In order to further enhance the picturesque character of Gowna, consider improvements to the public realm in the village centre. Currently, the heart of the village is dominated by large carriageways with overhead cables, and lacks planting and attractive pavements. As such, remove unsightly overhead cables, upgrade street lighting, furniture, bins and pavement surfaces. These improvements should be introduced as per the county wide specifications. Similarly, consider the resurfacing of the main intersection with high quality and local materials in order to create a more pedestrian friendly streetscape that encourages walking.

Lough Gowna - existing: unwelcoming and concrete dominated village centre streetscape.

Proposed: potential redesign of the village centre streetscape with improved pavements and lighting, introduction of seating, bins and planting.

	•.
	•.
	•

In conjunction with the measure aimed at discouraging parking on the kerbs around the central junction, consider the creation of a more vibrant centre. As such, widen the pavement and to use trees, planters and furniture to enliven the streetscape. This will also allow space for additional seating in front of the tavern, and will provide a flexible expansion zone in front of the post office and any other retailers. Such a zone could be used for informal social and civic uses.

In similar manner, consider the removal of the degraded phone box at the central junction and consider installing a smart bench with integrated wifi and charging, which could be used by either people residing in, or travelling through Gowna.

Lough Gowna - existing: poor visual appearance of the main junction.

Proposed: upgrade pavements and introduce planting, street furniture and bins.

Lough Gowna - existing: degraded and unused phone box.

Proposed: replace the phone box with a smart bench providing services to residents and visitors alike.

In order to activate the town centre and attract new residents and businesses, redevelop key sites in Gowna as identified in the proposals map.

As such, residential use within the village centre should be encouraged by upgrading and using vacant buildings through the Action Plan for Rural Ireland. Vacant properties could also be used for temporary start up businesses, community groups or events. Similarly, utilise and restore derelict or run down sites identified within Gowna to reinstate them as active landmark buildings. These are key sites, strategically located along approach roads and should be prioritised over identifying greenfield sites. This would help to limit urban sprawl and create a more lively village.

Lough Gowna - existing: abandoned building in Gowna awaiting activation.

Proposed: restore key bu and homes.

CONSULTATION FINDINGS

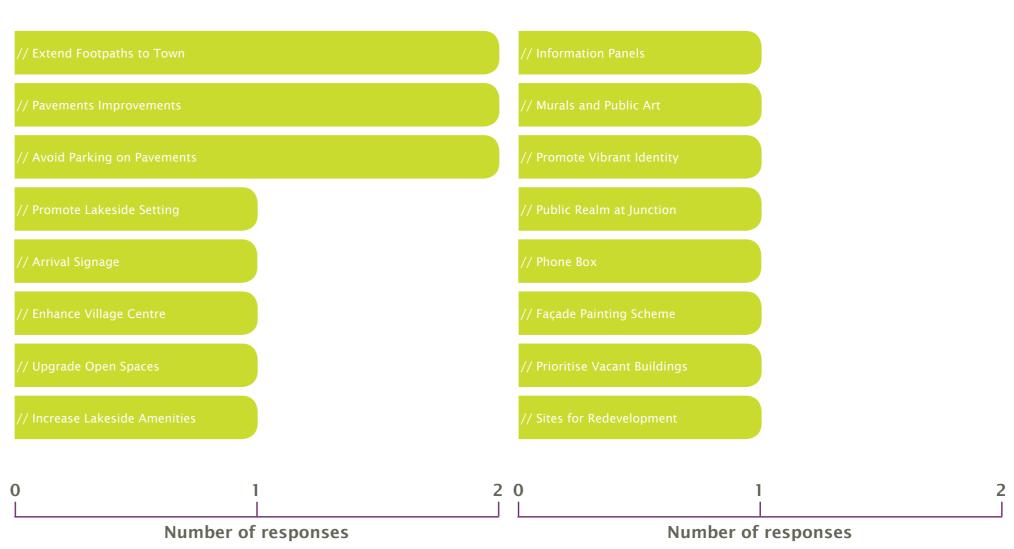

This section presents the summary of the findings of the public consultation.

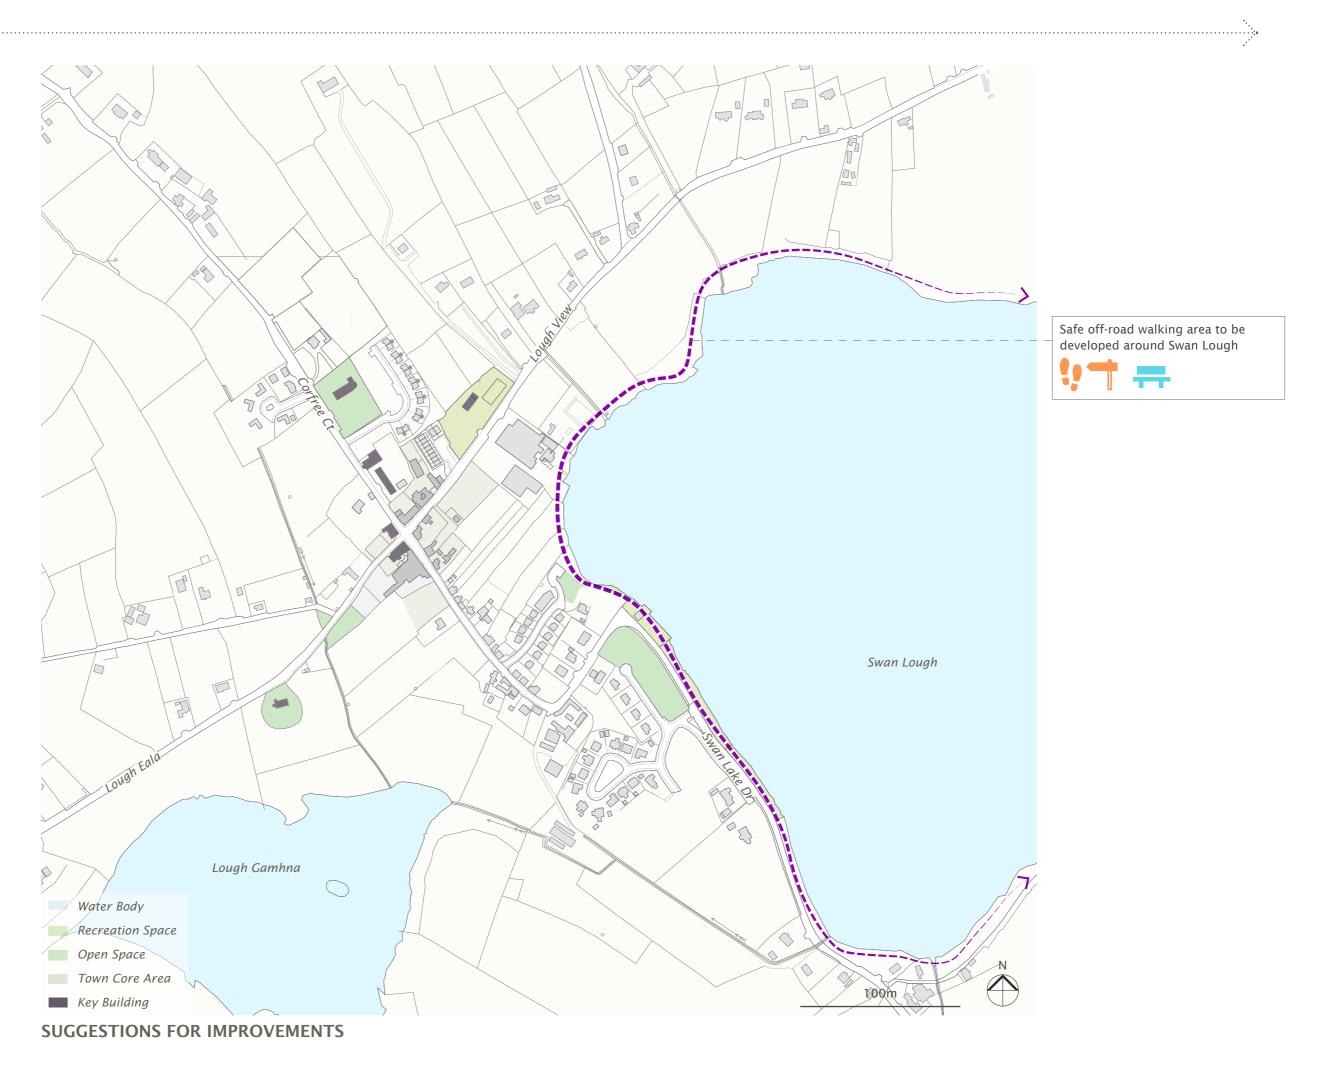

A draft of the proposals presented in this report has been subject to a public consultation which led to the revised and final suggestions of the present report. The proposals were presented and members of the public were invited to provide feedback as to which proposal they thought would be most likely to improve Lough Gowna, and which they thought were least likely to improve the town.

The findings are illustrated opposite, with the extended footpaths to town, pavements improvements and restricted parking on pavements were considered to be the most effective.

On the following page, additional suggestions provided by the public are illustrated on the map. These suggestions will be considered and incorporated as part of any formal proposals going forward.
