4 Lake Water Quality

Lakes are listed in alphabetical order.

Summary Data

Lake name and catchment:

River name and catchment: Included are the lake name and the catchment name (*namely: the Erne, the Boyne, the Shannon and the Glyde*). Sub-catchments and water management units are not listed.

The Lake water body code is given for each lake. The Current Ecological status as defined is given with target ecological status. The target ecological status cannot be lower than Good. A target date for reaching the target ecological status is included for each station.

Annual Status:

This table indicates the annual status of the lake in question and includes

- ◆ Average annual Total P ($\mu\text{g/l}$),
- ◆ Maximum Chlorophyll,

Assessment:

A summary assessment of the water quality is given which is based on the scientific data.

Change from 2012:

Where applicable any significant changes in quality from 2011 are also given.
