

What Happens Next?

Any comments/information received from the public at this stage will inform the options selection process and scheme development. A detailed assessment of the options will be carried out under the following headings:

- Economy
- Safety
- Environment
- Accessibility & Social Inclusion
- Integration
- Physical Activity

All information gathered via the enclosed feedback forms will be used by the Project Team in consideration of a Preferred Option..

Your Involvement

In compliance with current COVID-19 measures, and to provide access to project information in a safe environment, all project information, including Options Drawings are available to view online at www.cavancoco.ie/n3-dublin-road-schemes. A copy of the scheme information will be on display in the window of the Johnston Library in Cavan Town for the duration of this PC period.

The Project Team is available to answer any queries you may have during this public consultation period. To arrange a telephone call or online consultation, please contact us by:

 **Email:** n3dublinrdschemes@rpsgroup.com

 **Phone:** 01 709 8048 (weekdays 9am-4pm)

How to return your completed feedback form:

 **Online Form:** www.cavancoco.ie/n3-dublin-road-schemes

 **Email:** n3dublinrdschemes@cavancoco.ie

 **Post:** Cavan County Council, Road Design, Courthouse, Farnham Street, Cavan H12 R6V2

All feedback should be returned to the project team by Friday 4th June 2021.

Further Information

N3 Dublin Road Roundabout Scheme & N3 Cavan Crystal to Kilmore Roundabout Safety Scheme

Public Information Leaflet
Options Selection, Study Area & Constraints
30th April 2021 to 21st May 2021

Need for the Scheme

Cavan County Council is working in association with Transport Infrastructure Ireland (TII) to upgrade the N3 on the outskirts of Cavan Town between the Cavan Crystal Hotel and the Kilmore Roundabout. This project consists of two separately funded schemes namely the N3 Dublin Road Roundabout Upgrade and the N3 Cavan Crystal to Kilmore Roundabout Safety Scheme.

The N3 Dublin Road Roundabout & N3 Cavan Crystal to Kilmore Roundabout Schemes are located on the outskirts of Cavan Town. The N3 is considered to be of strategic importance as it connects Dublin with Cavan and the entire northwest, and carries significant volumes of commuter traffic. It also provides a significant link for all road users between Cavan Town and the various businesses and industries along this section of the N3.

Context of the Scheme

The existing N3 Dublin Road Roundabout junction experiences significant peak-time traffic congestion issues, which can also lead to potential safety issues due to driver frustration and dangerous manoeuvres. Furthermore, the Vulnerable Road User (VRU) facilities through and around the junction are sub-standard and sporadic, again leading to safety concerns. Similarly, the existing vulnerable road user facilities along the N3 and R212 are sub-standard and unsafe for all road users. The collision data indicates that there are significant collision problems, particularly in the vicinity of the roundabout, and the need for improvement of these conditions is clear.

The proposed schemes involve:

- ✓ Online upgrade of the main roundabout to improve traffic congestion and safety concerns.
- ✓ Addition and improvement of VRU facilities on the roundabout, and the N3 eastern section, and the R212 section.
- ✓ Implementation of traffic calming measures on the N3 eastern section.

What's Happening Now?

Cavan County Council have recently commissioned a technical engineering consulting design team, RPS, to progress the scheme development. The Project Team is currently working through the Options Selection phase. This information leaflet represents the first non-statutory public engagement / consultation and we are seeking your feedback on the options being considered, and any information relating to the study area and constraints.

Study Area

The Project Team has defined a study area and is in the process of identifying artificial and natural constraints within the study area. These include local Economic, Engineering and Environmental constraints. The study area is shown above in Figure 1.
